Assistant Sanitary Inspector - C.L. Hunt, A.R. San: I., M.S.I.A., C.S.I.B.

Clerk - G.M. Stewart.

ALTON URBAN DISTRICT COUNCIL, Council Offices, High Street, Alton, Hants.

Mr. Ghairman, Ladies and Gentlemen,

I beg to submit the annual report on the health and sanitary discumstances of your district for the year 1952.

The general health of two community is good and there was a very low incidence of infectious diseases notified,

The fact that there were no maternal deaths during the year and that the loss of infant life was low bears testimony to all dectors and nurses concerned as well as the parents. No cases of diphtheria were notified for the seventh successive year, but all concerned with the health and well being of young children are reminded that protection against this disease must not be neglected, and that all children should have completed a course of immunisation by the end of their first year.

My personal thanks are due to Mr. Webb and his staff for their invaluable assistance to me since I took up my appointment and for their co-operation in compiling this report.

Randall Martin.

GVATERIOR OF HE DISTRICE.

Area - 4,035 agres.

Esteable Value - £64,163.

Fur represented by a penny rate - £250.

Icpulation - 3,553.

Attention is drawn to the fact that this rate for the Alton Urban District owing to the small numbers involved is not statistically significant and rate comparisons with other districts or earlier years is misleading.

Immunisation to relation to total child population:-No. of children at 31/12/1952 who had completed a course of immunisation at any time before that date. (i.e. at any time since 1/1/1938).

Age at 31/12/32 Unuov 1 i.e. born in year - 1952	1.55	2 1950	3 1949	7.943	5-14 1938- 1947	Total under 15.
Number Emmunised 51.	58	85	3.03	97	738	1132
Estimated mid year pop. 1952		376			1331	2207.

These figures mean that 51.3% of our children have been protected against diphtheria. No cases of diphtheria have been reported in the Urban District since 1946 and throughout the country the incidence of the disease continues to fall. But this must not lead to a feeling of completency. The absence of the disease from the consumity has minimised the fear of diphtheria but if parents leave their children unprotected there may be a recurrence or diphtheria outbreaks. Diphtheria still kills and the chimination of the disease is conditional upon the maintenance of a high immunisation rate. The figures for the district are disturbingly low and every effort must be made to have all children by the age of one year completely immunised against diphtheria.

The best time to start the course, which consists of two small injections is between the age of six to nine months.

PROVISION OF GENERAL HEALTH SERVICES FOR THE AREA.

Ambulance facilities,

Ambulances for infectious diseases and other cases (non-infectious, accident and maternity) are stationed at Alton. Application for use of ambulances are made to the Aldershot Ambulance Station (Telephone - Aldershot 2244).

Child Welfare.

A Climic for children under the age of five years is available at the Assembly Rooms every Tuesday afternoon from 2 - 4 p.m.

Dan Nursery.

A day nusery is evailable at the Manor House, Alton providing accommodation for twenty four children between two and rive years of age. The nursery was well used during year and there was a waiting list for accommodation throughout the year.

Home Help Service.

A scheme of domestic help is available. The helpers are experienced women carefully chosen for their switability for the work. They will run the home carefully, their duty being to take over the housewife's work.

Home Helps are available for the following types of case When the housewife is sick or had to have an operation; when a new baby is expected; when several members of a household are ill at the one time; and to give help to the elderly and infirm.

Application for a home helpaccompanied by a medical certification for a home helpaccompanied by a medical certification. The charge depends on the hours worked and the income of the family after certain allowances have been made.

Laboratory Facilities

Bacteriological examinations of clinical matter (sputum, swabs etc.) and of water, milk and foodstuffs are carried ou at the Public Health Laboratory at the Royal Hampshire County Hospital, Winchester. Chemical analysis of water, sewage, milk and other samples are carried out by arrangement with the Public Analyst, Southempton.

Midwideny and Home Mucaing.

These services are carried out for Alton by :-

Mics D.R. Full, S.J. A. (Gas/sir) -- Midwifery and 4, Edward Road, General Nursing. Alton.

Mis. M. Crembia, S.R.N.
Hill Grest.
Windmill Hill,

- General Nursing.

Anto Hatel Glinis ..

This clinic is hold every Thursday at Alton General Hospital.

School Health Service.

Glimies are hold as follows :-

Tuberculosis.

Cliracs and held at Aldershot, Basingstoke and Winchester. Whilst sanitoria are available at Eichopstoke, Chandlers Ford, Liphook and Alton (Morland Hall and Lord Mayor Treloar Hospital)

Vonckel Discasos.

Clinics are hold at Aldershot, Basingstoke and Winchester.

Axea Wolfaro Usricer.

The Area Welfare Officer is Mr. C. Homsley whose office is at Manor Park House, Aldershot (Telephone - Aldershot 1778) His assistant is Mr. P.H. Dean, County Council Health Centre, Brambley Grange, Besingstoke.

ALTON URBAN DISTRICT COUNCIL.

ANNUAL REPORT OF THE SANITARY INSPECTOR FOR THE YEAR HIDED 31st. DECEMBER 1952.

Supilary Circumstances of the Area.

I Wester Supply.

The supply of water to the Area continues to be satisfacto both as regards quality, as confirmed by the reports of the Analyst, and quantity.

Good progress has been made with the Beech Water Scheme. The whole of the six inch and four inch diameter mains have been laid as also have two subsidiary mains, one of 2 inche and one of 14 inches diameter.

The Booster houses have been erected and the pumping plandalivered and the Plant Manufacturers Fitter is expected each the year.

Work on the laying of service pipes to private properties in progress, all communicating pipes having been laid at the same time as the mains.

The Borovere area has been disconnected from its original supply and connected to the new six inch main, and the Trelear Hospital has also been connected to its six inch feeder main, the old three inch meter having been removed and a six inch meter fitted in its place. In effect the whole length of six inch main forming part of this scheme is now in use.

As soon as the pumping plant has been installed at Beech, final tests will be made on the mains and services, the installation will be washed out and chlorinated and the scheme will go into use.

2. Sewerage.

The improvement scheme at the Outfall Works has been programmed, by the Ministry of Health, to be commenced in the early part of January, 1953 and to this end Tenders have be obtained from various Contractors by advertisement.

Supplies of pipes and fittings are well advanced and the majority are already on the site.

It is anticipated that, during the course of the scheme difficulties will arise with the treatment of the sewerage, but, with the genuine co-operation of the Consulting Engineer and the successful Contractor, these should not prove to be insuperable.

The Thames Conservancy Board control all rivers and streams in the Area.

3. Public Cleansung.

During the course of the year the market for salvage has collapsed and new arrangements have had to be made for the disposal of refuse.

In order not to overload the controlled tip it has been decided that so much of the paper as can easily be sorted by the collecters shall be carried in the old salvage to mpartment of the vehicle and shall be burned at the Outfull Forks, where arrangements have been made for dealing with it.

The collection of trade refuse has been put onto a similar footing to that which existed prior to the war and it is now proposed that the following charges be made: --

15/- per load.
7/6 per half load.
6d. per bin to be paid by coupon.

4. Mast and Other Mood.

Every smirred slaughtered at the Ministry Slaughter house has been inspected. The Manager and Slaughtermen have been nost co-operative during the year.

Carcases Inspected and Gondenned. Cattle Cows Calves Sheep Pigs. excluding and cows. Lambs INTEREST ENTIRED 1077 306 2535 1027 Munber unspected, 1277 306 10/7 2535 1027 LE GRESCIOS CHOOPE Luberquile et s.
